New Claims 15-21 (Clean Version)

- 15. The fabric-elastomer sandwich of claim 12, wherein the elastomer is constituted by mixtures based on materials selected from a group comprising polyurethane, polyvinyl chloride, polyolefin, natural and synthetic rubber and acrylic, polyurethane and silicone resins.
- 16. The fabric-elastomer sandwich of claim 12, wherein the separate elastomer regions have thickness and areas selected according to requirements.
- 17. The fabric-elastomer sandwich of claim 12, wherein the separate elastomer regions have a thickness of 2mm.
- 18. The fabric-elastomer sandwich of claim 12, wherein the fabric is made of materials selected from a group comprising nylon, polyester, natural fibers and mixed natural and synthetic fibers.
- 19. The fabric-elastomer sandwich of claim 18, wherein the fibers comprise cotton, linen and aramid fibers.
- 20. The fabric-elastomer sandwich of claim 13, wherein said separate elastomer regions have a discontinuous configuration that provides high elasticity.
- 21. The fabric-elastomer sandwich of claim 12, further comprising an osmotic membrane bonded thereto that provides breathable/impermeable properties .--
